PDPA COMPLIANCE

Compliance is black and white.
Your business isn't.

Certification readiness to the gold standard: led by certified practitioners, built clause by clause on each standard

We prepare organisations for the PDPA, DPTM, Cyber Essentials, the Cyber Trust mark and ISO certification. What sets the work apart is below, with the proof.

15+
DPTM implementations

50+
ISO 27001 and 22301 implementations led by our ISO consultant

2,000+
hours of PDPA and information security training delivered by our trainers

The Gold Standard, defined

Certified lead in every discipline
Each discipline is led by a holder of its own professional credential.

Assessor-ready evidence
Every deliverable maps to the clause the assessor tests.

Built on each standard, and on how it is enforced
We work clause by clause from the standard you are certifying to, and from what regulators have actually enforced.

We stay after the certificate
A named Data Protection Officer, monthly support and an annual review, in plain English.

What we do

PDPA compliance
Named DPO, policies, breach response and PDPC notices

Security setup
Microsoft 365, laptops and phones, backup, network

Certifications
DPTM, Cyber Trust mark, ISO: side by side

Training and insurance
Staff training, breach rehearsals, insurance readiness

What you can check before you hire us

A sample of our work
Three of our real formats, filled with invented data: a gap report page, an evidence-pack index and a Microsoft 365 plan map.

Our credentials, and how to verify each
Ask us for the holder's name and certificate number, then check it with the issuer.

Client contacts, on request
Speak to a client who has agreed to take a call about our work.

The analysis behind our advice
Every PDPC decision published since 2016, read and classified by outcome, cause and sector.

Who stands behind the work

Gea Ban Peng, Chief Executive Officer. Certified consultants in every discipline: CIPM privacy specialists, ISO lead auditors and qualified adult educators.
